

NYC Real Estate Sales Dashboard

This Tableau dashboard presents a comprehensive analysis of NYC property sales. It includes summary KPIs, time series trends, and neighborhood comparisons to help business stakeholders make data-driven decisions.

Key Features:

- Total Sales, Average Sale Price, and Total Transactions as KPI Cards.
- Monthly Sales Trend line chart using Sale Date.
- Top 10 Neighborhoods by Total Sales using a bar chart.
- Interactive filters for Neighborhood, Building Class, and Year Built.

Sample Insights:

- Manhattan and Brooklyn show consistently high total sales.
- Certain boroughs have significantly lower average sale prices.
- Sales spike during mid-year months, indicating seasonal trends.
